Full-Stack Developer. Passionate about problem-solving and applying skills in the field of computer science. I stand out for contributing efficient and creative solutions, adapting quickly, and building good teamwork dynamics.

EXPERIENCE

Solvd, Inc – Software Developer Internship

March 2024 – December 2024

- Built a medical appointment **REST API** with Node.js, MySQL, Docker, Jest, and CI/CD.
- Developed a multiplayer Alias game with chat, word verification, and turn management.
- Collaborated in an English-speaking team.

Project Flick Finder – Frontend Developer

November 2023

- Development of a movie library application using HTML, CSS, Typescript, and Angular.
- Integrated a third-party movie API to retrieve and display up-to-date movie information.
- Participated in sprint planning, daily stand-ups, and reviews following the **Scrum** methodology.

Project PokeMarket – Backend Developer

June 2023

- Developed a card trading system for Pokémon cards, allowing users to buy, sell, and exchange cards in a secure and organized way.
- Designed and implemented the backend architecture using Java, following object-oriented programming principles.
